

ELECTRIC DISTRIBUTION BOARD AND METER POSITION

The position of your Electric Distribution Board (i.e. fusebox/consumer unit) is **in your bedroom to the right hand side of the window** and meter is **outside your flat in the passage way, inside the plastic electric meter box**

If one of your circuit breakers trips:

- a) switch off the main electric isolator switch
- b) switch your circuit breaker back up
- c) turn the main electric isolator switch back on

If your circuit breaker trips again, then LEAVE IT and phone the landlord.

IF YOU ARE UNSURE ABOUT ANYTHING THEN LEAVE IT!
