Your new dryer

Congratulations - You have chosen a modern, high-quality Bosch domestic appliance. The condensation dryer is distinguished by its economical energy consumption. Every dryer which leaves our factory is carefully checked to ensure that it functions correctly and is in perfect condition. Should you have any questions, our after-sales service will be pleased to help.

Disposal in an environmentally-responsible manner
Dispose of packaging in an environmentally-responsible manner. This appliance is labelled in accordance with the European guideline 2002/96/EG on waste electrical and electronic equipment - WEEE. The guideline provides an EU-wide framework for the return and recycling of old appliances.

For further information about our products, accessories, spare parts and services, please visit: www.bosch-home.com

Observe the safety instructions on page 11.

Read these instructions and the separate Energy-saving mode instructions before operating the dryer.

Reduced temperature for delicate fabrics that require a longer drying time; e.g. for polyacrylcs, polyamide, elastane or acetate.

Intended use
- for domestic use only,
- only to be used for drying fabrics that have been washed with water.

Do not leave children unsupervised near the dryer. Keep pets away from the dryer. The dryer can be operated by children 8 years old and older, by persons with reduced physical, sensory or mental abilities and by persons with insufficient experience or knowledge if they are supervised or have been instructed in its use by a responsible adult.

Preparing for installation, see Page 8

Never start the dryer if it is damaged! Inform your after-sales service.

Make sure your hands are dry. Hold the plug only.

Connecting the mains plug (c) &
All buttons are sensitive and only need to be touched lightly.

Only operate the dryer with the fluff filter inserted!

Select the drying programme ...

Selecting and adjusting the programme ... and adapt to individual requirements

Selecting and adjusting the drying result

The drying result (e.g. Cupboard Dry) can be adjusted over three levels (1 - max. 3) for the Cottons, Easy-Care and SuperQuick 40’ programmes. After one of these programmes has been finely adjusted, the setting is retained for the others. Further information → Page 5/6.

Clean the fluff filter and/or air cooler under running water. → Page 4/6.
Emptying condensation

Empty container after each drying operation!
1. Pull out condensation container keeping it horizontal.
2. Pour out condensation.
3. Always push container in fully until it clicks into place.

Cleaning the fluff filter

Clean the fluff filter after each drying operation.
1. Open the door, remove fluff from door/door area.
2. Pull out and fold open the fluff filter.
3. Remove the fluff (by wiping the filter with your hand).
   If the fluff filter is very dirty or blocked, rinse with warm water and dry thoroughly.
4. Close and reinsert the fluff filter.

Switching off the dryer

Turn the programme selector to Off.
Do not leave laundry in the dryer.

Removing the laundry

The automatic anti-crease function causes the drum to move at specific intervals, the washing remains loose and fluffy for an hour (two hours if the additional Reduced Ironing function is also selected—depending on model).

Programme end once lights up in the display.

Interrupt programme removing or adding laundry.

The drying cycle can be interrupted for a brief period so that laundry may be added or removed. The programme selected must then be resumed and completed.

Never switch the dryer off before the drying process has ended. Drum and door may be hot!

1. Open door, the drying process is interrupted.
2. Load or remove laundry and close door.
3. If required, select a new programme and additional functions.
4. Press the Start/Stop button.
**Information on laundry ...**

**Labelling of fabrics**

- Follow the manufacturer's care information.
- Drying at normal temperature.
- Drying at low temperature → also select i: Low Heat.
- Do not dry machine dry.

Observe safety instructions without fail → Page 11!

Do not tumble-dry the following fabrics for example:
- Impermeable fabrics (e.g. rubber-coated fabrics).
- Delicate materials (silk or curtains made from synthetic material) → they may crease
- Laundry contaminated with oil.

**Drying tips**

- To ensure a consistent result, sort the laundry by fabric type and drying programme.
- Always dry very small items (e.g. baby socks) together with large items of laundry (e.g. hand towel).
- Close zips, hooks and eyelets, and button up covers.
- Tie fabric belts, apron strings, etc. together
- Do not over-dry easy-care laundry → risk of creasing!
- Allow laundry to finish drying in the air.
- Do not dry woolens in the dryer, only use to freshen them up → Page 7, Woolens finish Programme (depending on model).
- Do not iron laundry immediately after drying, fold items up and leave for a while → the remaining moisture will then be distributed evenly.
- The drying result depends on the type of water used during washing. → Fine adjustment of the drying result → Page 5/6.
- Machine-knitted fabrics (e.g. T-shirts or jerseys) often shrink the first time they are dried → do not use the Extra Dry programme.
- Starched laundry is not always suitable for dryers → starch leaves behind a coating that adversely affects the drying operation.
- Use the correct dosage of fabric softener as per the manufacturer's instructions when washing the laundry to be dried.
- Use the timer programme for small loads → this improves the drying result.

**Environmental protection / Energy-saving tips**

- Before drying, spin the laundry thoroughly in the washing machine → the higher the spin speed the shorter the drying time will be (consumes less energy), also spin easy-care laundry.
- Put in, but do not exceed, the maximum recommended quantity of laundry → programme overview → Page 7.
- Make sure the room is well ventilated during drying.
- Do not obstruct or seal up the air inlet.
- Keep the air cooler clean → Page 6 “Care and cleaning”.

**Fine adjustment of the drying result**

**Adjustment of the levels of dryness**

- Turn to Off
- 1 x to the right
- Press and hold i: Low Heat and turn 5 x to the right
- Press i: Low Heat until the required level is reached
- Turn to Off

**Drying**

- Iron Dry
- cupboard dry
- Anti-Crease/End are displayed in sequence.
- Short signal when changing from level 3 to 0, otherwise long signal.

**Care and cleaning**

**Dryer housing, control panel, air cooler, moisture sensors**

- Wipe with a soft, damp cloth.
- Do not use harsh cleaning agents and solvents.
- Remove detergent and cleaning agent residue immediately.

Clean the protective filter 5 - 6 times a year or if Clean flashes after cleaning the fluff filter.

**Air cooler / Protective filter**

- When cleaning, only remove the protective filter. Clean the air cooler behind the protective filter once a year.
- Allow the dryer to cool.
- Residual water may leak out, so place an absorbent towel underneath the maintenance door.

1. Unlock the maintenance door.
2. Open the maintenance door fully.
3. Turn both locking levers towards each other.
4. Pull out the protective filter/air cooler.
5. Do not damage the protective filter or air cooler.
   Clean with warm water only. Do not use any hard or sharp-edged objects.
6. Clean the protective filter/air cooler thoroughly.
   Allow to drip dry.
7. Clean the seals.
8. Re-insert the protective filter/air cooler, with the handle facing down.
9. Turn back both locking levers.
10. Close the maintenance door until the lock clicks into place.

**Moisture sensors**

The dryer is fitted with stainless steel moisture sensors. The sensors measure the level of moisture in the laundry. After a long period of operation, a fine layer of limescale may form on the sensors.

1. Open the door and clean the moisture sensors with a damp sponge which has a rough surface.

Do not use steel wool or abrasive materials.
Sort the laundry according to type of textile and fabric. Fabrics must be suitable for tumble drying.

<table>
<thead>
<tr>
<th>PROGRAMMES</th>
<th>TEXTILE TYPE AND INFORMATION</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Cottons</strong></td>
<td>max. 7 kg Hard-wearing fabrics, boil-resistant fabrics made of cotton or linen.</td>
</tr>
<tr>
<td>Easy-Care</td>
<td>max. 3.5 kg Non-iron laundry made of synthetic fibres and blended fabric, easy-care cotton.</td>
</tr>
<tr>
<td>Iron Dry</td>
<td>Fabrics suitable for ironing (iron fabrics in order to avoid creasing).</td>
</tr>
<tr>
<td>Extra Dry</td>
<td>Fabrics made of thick, multilayered items of clothing.</td>
</tr>
<tr>
<td><strong>Sportswear</strong></td>
<td>max. 1.5 kg Fabrics with membrane coating, water-repellent fabrics, functional clothing, fleece fabrics (dry jackets/trousers with removable internal lining separately).</td>
</tr>
<tr>
<td>SuperQuick 40'</td>
<td>max. 2 kg Laundry made of synthetic fibres, cotton or blended fabrics (for example) that needs to be dried quickly. The values may differ from the those specified depending on the type of fabric, mixture of laundry to be dried, residual moisture in the fabric and loading capacity.</td>
</tr>
<tr>
<td><strong>Timed Programme</strong> warm 20 min.</td>
<td>max. 3 kg Predried, multi-layered, sensitive fabrics made of acrylic fibres, or separate small items of laundry. Also for subsequent drying.</td>
</tr>
</tbody>
</table>

*for **Cottons** and Easy-Care programmes only
**Dryness levels can be selected individually: Extra Dry, Cupboard Dry and Iron Dry (depending on the model).

Degree of dryness can be finely adjusted; multi-layered textiles require a longer drying time than single-layered items of clothing. Recommendation: Dry separately.

Installation

1. **Setting up the dryer**
   - Do not set up the dryer in a room that is susceptible to frost.
   - Do not let the dryer door remain open without the appliance connected by an expert.
   - The appliance must always be accessible.
   - Keep the area around the dryer level and unobstructed.
   - The appliance plug must always be accessible.
   - Do not put the dryer behind a door or sliding door as this may obstruct or prevent the dryer from opening.
   - Do not use the dryer if there is a danger of frost.

2. **Mains connection**
   - See safety instructions Page 9.
   - Connect to an AC earthed socket. If in doubt have the socket checked by an expert.
   - The mains voltage and the voltage shown on the rating plate (Page 9) must correspond.
   - The connected load and necessary fuse protection are specified on the rating plate.

3. **Frost protection / Transport**
   - Take all accessory parts out of the drum.
   - The drum must be empty.
   - The drum remains unobstructed.
   - Keep the area around the dryer clean.
   - Make sure the dryer remains unobstructed.

4. **Preparation**
   - Empty the condensation container Page 4.
   - Select any programme using the programme selector.
   - Condensation is pumped into the container.

5. **Installation**
   - Do not operate the dryer if there is a danger of frost.
   - Do not attempt to lift it on your own.
   - Do not lift the dryer by any of the protruding parts (e.g. the door) as they may break off.
   - Do not set up in a room that is susceptible to frost. Freezing water may cause damage.
   - Take all accessory parts out of the drum.
   - The drum must be empty.
   - The drum remains unobstructed.
   - Make sure the dryer remains unobstructed.

6. **Care and cleaning**
   - Clean and level
   - Maintenance
   - Replacement parts
   - Service intervals
   - After drying...
     - Iron laundry
     - Lightly iron laundry
     - Do not iron laundry
     - Mangle laundry
Technical data

- Dimensions (DxWxH): 60 x 60 x 85 cm (height adjustable)
- Weight: approximately 45 kg
- Max. capacity: 7 kg
- Condensation container: 4.2 l
- Connection voltage: see appliance rating plate
- Connected load: see appliance rating plate
- Fuse protection: see appliance rating plate
- Ambient temperature: see appliance rating plate
- Product number/Production number: see appliance rating plate

You can find the rating plate on the back of the dryer.

Drum interior light (depending on model) (bulb E14, 25 W)
The drum lights up after the door is opened or closed, and after the programme starts, and switches off automatically. Changing the bulb → page 10.

* Programme setting for testing in accordance with applicable standard EN61121.
** The values may differ from those specified, depending on the type of fabric, composition of laundry to be dried, residual moisture in the fabric and the amount of laundry being loaded.

Optional accessories (from after-sales service using order number)

- Platform
  For easier loading and unloading. The basket contained in the drawer can be used to carry the laundry.

- Washer-dryer stack connection set
  The dryer can be placed on top of a suitable washing machine with the same width and depth to save space. The dryer must be fastened to the washing machine using this connection set. With pull-out worktop: WTZ 11300

- Connection fittings for condensation outlet
  The condensation is conveyed directly via a hose.

Installation underneath the worktop
Instead of the appliance covering plate, you must have a metal cover fitted by a specialist.

What to do if ...

If you cannot rectify a fault yourself (e.g. switching off/on), please contact our after-sales service. We will always find an appropriate solution and will avoid unnecessary visits by engineers. Trust the expertise of the manufacturer and rest assured that the repair will be carried out by trained service technicians using original spare parts. The contact details of your local after-sales service can be found in the enclosed after-sales service directory, or by calling one of these numbers:
- GB 0844 8928979 (Calls from a BT landline will be charged at up to 3 pence per minute.
  A call-set-up fee of up to 6 pence may apply.)
- IE 01450 2655 (0.03 € per minute at peak. Off peak 0.0088 € per minute.)
When contacting the after-sales service, please quote the appliance’s product number (E no.) and production number (FD) (see the inside of the door).
Set the programme selector to Off and remove the appliance plug from the socket.

- The Start/Stop indicator lamp does not light up.
  Mans plug plugged in? Programme selected? Check the socket fuse.
- The display panel light and indicator lights (depending on model) go out and the Start/Stop indicator light flashes.
  Energy-saving mode is activated → see the separate Energy-saving mode instructions.
- The Container and Start/Stop indicator lights are flashing.
  Empty the condensation container. If featured, check hose for condensation outlet.
- The Clean and Start/Stop indicator lights are flashing.
  Clean the fluff filter and/or air cooler under running water → Page 4/6.
- The dryer does not start.
  Start/Stop button selected? Door closed? Programme set? Ambient temperature greater than 5 °C?
- Water is running out.
  Align dryer horizontally. Clean air cooler seal.
- The door opens by itself.
  Push the door closed until you hear it engage.
- Creasing.
  Laundry load exceeded? Remove articles of clothing immediately after the end of the programme, hang up and pull into shape. Unsuitable programme selected → Page 7.
- Drying result is not satisfactory (laundry feels too damp).
  Warm laundry feels damper than it actually is. The selected programme does not suit the load. Use another drying programme or, in addition, select the time programme → Page 7.
  Use fine adjustment for the drying result → Page 5/6.
- programme set? Programme termination, e.g. tank full, mains power supply failure, door open or maximum drying time reached.
- The humidity in the room increases significantly.
  Make sure the room is sufficiently ventilated.
- The humidity in the room increases significantly.
  Make sure the room is sufficiently ventilated.
- Mains failure.
  Remove laundry from the dryer immediately and spread out. This allows the heat to dissipate.
- One or more indicator lights for programme status are flashing.
  Clean filter and air cooler → Page 4/6.
  Check installation conditions → Page 8.
  Switch off, leave to cool down, switch on again, restart programme.
- The interior light is not working (depending on model).
  Pull out the appliance plug, remove the cover cap in the interior above the door (use Torx 20 screw driver) and replace the bulb. Close the cover cap. Never operate the dryer without a cover cap.
Safety instructions

Emergency
- Pull the appliance plug out of the socket immediately or disconnect the fuse.
- in rooms inside the house.
- to dry fabrics.

The dryer must NEVER...
- be used for other purposes than those described above.
- be modified in terms of its technology or attributes.

Dangers
- The dryer must not be used by children or persons who have not been instructed in its use.
- Do not leave children unsupervised near the dryer.
- Keep pets away from the dryer.
- Remove all objects from pockets.
  Make especially sure that cigarette lighters are removed as they constitute an → explosion hazard.
- Do not lean or sit on the door → risk of tipping.

Installation
- Secure loose cables → tripping hazard.
- Do not operate the dryer if there is a risk of frost.
- Connect the dryer according to specifications to an AC earthed socket, as otherwise it cannot be guaranteed that the appliance is completely safe.
- The cable cross-section must be sufficient.
- Only use earth-leakage circuit breakers with the following symbol: 
- The appliance plug and socket must be compatible.
- Do not use multiple plugs/couplings and/or extension cables.
- Do not hold the appliance plug with wet hands → risk of electric shock.
- Never pull the appliance plug out of the socket by its cable.
- Do not damage the mains lead → risk of electric shock.

Operation
- Only load the drum with laundry.
- Check the contents before you switch the dryer on.
- Do not use the dryer if the laundry has been in contact with solvents, oil, wax, grease or paint (e.g. hair setting spray, nail polish remover, stain remover, cleaning solvent, etc.) → fire/explosion hazard.
- Dust (e.g. coal dust, flour) poses a danger: do not use the dryer → explosion hazard.
- Do not put laundry containing foamed material/rubber in the dryer → elastic material may be destroyed and the dryer may be damaged due to possible deformation of the foamed material.
- Switch off the dryer once the programme has ended.
- Condensation is not drinking water and may be contaminated with fluff.
- Do not use the dryer if it is defective or if you suspect it is.
  Repairs must only be carried out by the after-sales service.
- Always pull the mains plug out of the socket before changing the bulb for the interior light → risk of electric shock.

Defect
- Do not use the dryer if the mains cable is defective. To avoid danger, only have the defective mains cable replaced by the after-sales service.

Spare parts
- Only use genuine spare parts and accessories for safety reasons.

Disposal
- Dryer: pull out the appliance plug, then cut off the mains cable from the appliance.
- Dispose of at municipal waste disposal facility.
- Packaging: do not leave children alone with packing parts → risk of suffocation.
- All materials are environmentally sound and can be reused. Dispose of in an environmentally-responsible manner.
