

ELECTRIC DISTRIBUTION BOARD AND METER POSITION

The position of your Electric Distribution Board (i.e. fusebox/consumer unit) and meter is **in your lounge in the cupboard in-between the two windows.**

If one of your circuit breakers trips:

- a) switch off the main electric isolator switch
- b) switch your circuit breaker back up
- c) turn the main electric isolator switch back on

If your circuit breaker trips again, then LEAVE IT and phone the landlord.

IF YOU ARE UNSURE ABOUT ANYTHING THEN LEAVE IT!
